The Microgrid Infrastructure Project, consisting of a battery storage system and electrical infrastructure, projects \$3.2 million in energy savings for the Port during regular operations over 20 ...

This cornerstone project provides renewable, reliable, and resilient power to meet operational needs on TAMT and advances Port emissions reductions goals. The ...

The microgrid went online in early 2024, providing backup power to critical Port facilities in support of the Port's role as a Strategic Port. As one of 18 designated U.S. Strategic Ports, the Port ...

The Port called upon PowerFlex to install a solar and battery energy storage system with microgrid infrastructure at the Tenth Avenue Marine Terminal in San Diego. A major maritime ...

This Resolution approves the contracts for San Diego Gas & Electric Company's four utility-owned circuit-level energy storage microgrid projects for a total of 39 megawatts of incremental capacity.

Extends the availability of renewable energy into peak demand hours to help reduce impacts of power outages, Public Safety Power Shutoffs (PSPS) and other emergency or unplanned service interruptions.

The Port of San Diego announced Dec. 7 that it has awarded a contract for the construction of its 700 kW Microgrid Infrastructure Project that will consist of a battery storage system ...

The project will develop a new, permanent, renewable microgrid at the Tenth Avenue Marine Terminal that can be replicated at other seaport terminals and distribution ...
