Does Mexico regulate storage?

Mexican legislation, however, neither defines nor regulates Storage. There are few references in the current legislation to the activity, no specific regulatory body oversees its development and there are no stipulations regarding the need to obtain any authorisation from the Energy Regulatory Commission (CRE).

How much electricity does Mexico generate from renewable sources?

According to data presented by the Mexican Ministry of Energy in 2020, Mexico had an installed capacity to generate electricity from renewable sources of approximately 31.2 per cent.

Is energy storage a facilitator of CO2 mitigation?

According to the document titled 5.3 Energy storage at utility scale as a facilitator of CO2 mitigation, published by the Mexican Ministry of Environment and Natural Resources, there are some regulatory and financial barriers which may hinder the cost-effective deployment of Storage technologies.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the ...
