Designed for the increasing demand of high power DC, ADG is ideal for testing EV's motor/compressor, server power supply, fuse/circuit breaker/contactors, and PV inverter or can be used as a facility ...

Standard features of all TS Series power supplies include an isolated 37-pin external I/O, RS232, remote interface software, IVI drivers, and LabVIEW drivers to facilitate integration into diverse programming ...

Supports self-consumption, peak-valley arbitrage, backup power, and other various scenarios. Max. DC input voltage. *The data sheet will be changed according to actual situation without prior notice.

Maintenance bypass cabinet with output transformer. The maintenance bypass isolates the UPS completely during service operations. The output transformer converts the 480 V output of the UPS ...

Paired with state-of-the-art SiC power semiconductors, Magna DC power supplies delivers class-leading power density, efficiency, and reliability, including continuous full-power operation up to 50°C ambient.

This heavy-duty enclosure securely houses a Stand By Power Supply and three (3) batteries along with equipment and cable required for fiber optic conversion and/or distribution.

They feature power supply, distribution, and protection equipment as well as radio systems and passive or active cooling. Contact us today to learn about all the options and to find a solution that is right for ...

With output power up to 100kW per unit, the ADG series offers output voltage up to 1600V and output current up to 2000A. Users can select standard RS-485 interface or optional RS-232 and GPIB.
