We deploy grid-tied, hybrid, and off-grid solar systems tailored to site conditions, load profiles, and future expansion requirements. We design robust power backup systems for businesses, industries, ...

The falling costs of solar panels and batteries, coupled with advancements in energy storage technologies, are likely to drive further ...

Portable energy storage system supports independent off-grid operation, delivering continuous and stable power without a grid connection. Ideal for construction sites, outdoor events, remote locations, ...

The falling costs of solar panels and batteries, coupled with advancements in energy storage technologies, are likely to drive further adoption of solar energy.

The Kenya Off-Grid Solar Access Project (KOSAP) is a project of the Ministry of Energy and Petroleum (MoEP) and is financed by the World Bank (WB). It aims at providing electricity and clean cooking ...

Namkoo Completes 200kW + 430kWh Solar Carport Project in Kenya Namkoo is proud to announce the successful completion of a 200kW + 400kWh solar + energy storage carport system for a local ...

This solar + energy storage carport solution showcases the future of industrial energy management--combining innovation, performance, and sustainability in one complete package.

Our systems are designed to store excess solar power for use during peak times or power outages, making them ideal for residential solar backup systems in Kenya and commercial solar backup ...
