Fibox is experienced in engineering, manufacturing and testing the required control units for wind turbines, and we can apply complete freedom in the design of ...

The Hopewind HW8000 Three-Level Medium-Voltage Wind Power Converter is designed for use with medium-voltage permanent magnet synchronous generators (PMSG) in wind power ...

It has an optimized layout for efficient power distribution, precise intelligent protection, a structure convenient for maintenance, and is suitable for multiple scenarios.

Fibox is experienced in engineering, manufacturing and testing the required control units for wind turbines, and we can apply complete freedom in the design of enclosures specific to your application.

In this blog post, I will share my experience and knowledge on how to design an efficient and reliable power distribution cabinet for a wind power project. Before starting the design process, it is crucial to ...

The machine-side converter rectifies the three-phase AC output from the fan-motor stator to DC to achieve stable DC voltage output under the conditions of different wind speeds and rotational speeds ...

Specialized in the design, R& D, manufacture of the high capacity AC & DC load bank, it owns the largest intelligent power supply testing equipment R & D centre in China.

It is an integrated cabinet system with multiple static var generator modulars. It has functions of reactive power compensation (PF correction), low order harmonic control and three phase ...
