What is Danish Center for energy storage?

Danish Center for Energy Storage, DaCES, is a partnership that covers the entire value chain from research and innovation to industry and export in the field of energy storage and conversion. The ambition of DaCES is to strengthen cooperation, sharing of knowledge and establishment of new partnerships between companies and universities.

How can Denmark develop a new energy technology?

If Denmark shall succeed in the development and implementation of new energy technologies such as energy storage and conversion, a broad knowledge of political and legal frameworks, economic models, the role of civil society as well as new forms of organization and collaboration across sectors and disciplines is necessary.

Can Denmark deliver to a green transition in energy storage & conversion?

But if Denmark really shall deliver to the green transition within energy storage and conversion, in times characterized by extreme pace and changeability, we must stand together and walk together. DaCES ensures the necessary cohesion that makes it happen. Lars Ottosen, Head of Department and Professor, AU Biological and Chemical Engineering

About Us: We specialize in turnkey energy storage solutions for wind/solar integration and power export systems. Since 2015, we've deployed 2.3 GW of storage capacity across 14 countries.

That's exactly what Aarhus-based energy storage systems aim to achieve. As Denmark pushes toward carbon neutrality by 2050, innovative power production models combining battery storage, smart grid ...

Construction of a new energy storage project in Aarhus Denmark Danish renewables company European Energy A/S has begun construction of its first large-scale battery energy storage ...

Artelia has experience with multiple technologies in energy storage. Artelia has assisted Kredsl&#248;b in developing a preliminary project for the establishment of pit thermal storage at several locations ...

The MOSS project in Aarhus uses molten hydroxide salt heated to 700&#176;C - hot enough to bake a dozen &#230;bleskiver pancakes simultaneously [8]. This thermal storage system can hold renewable energy for ...

Lolland to become a hub for hot rock energy storage. The energy and fibre-optic group Andel has decided to
