Can a custom enclosure meet the IP54 standard?

If you are looking for a custom enclosure that meets the IP54 standard, our professional designing and development team can help you a lot. Metal finishes can be customized including aluminum alloys, stainless steel, galvanized steel, and carbon steel, to meet your application requirements.

What is a stainless steel IP54 enclosure?

Stainless Steel IP54 Enclosure KDM manufactured IP54 enclosure to provide top-quality, easily customized cabinets that will perform well in your application. At KDM, our range of IP54 enclosures features a variety of different materials such as aluminum, carbon steel, and stainless steel.

Is IP54 suitable for outdoor applications?

IP54, just like our other IP enclosures, is suitable for outdoor applications because it is protected against low-pressure water sprays from any direction. However, keep in mind that these enclosures are not entirely dust-tight and waterproof, so very dusty or underwater environments may be too harsh for them.

What materials are used for IP54 enclosures?

The materials used for IP54 enclosures aren't different from materials used for other types of enclosures. They can be made from carbon steel, galvanized steel, and stainless steel - usually of the grades 304 or 316L. Of course, each has its advantages and disadvantages. Carbon steel is usually duller than stainless steel.

AZE designs and manufactures outdoor telecom cabinet enclosure from 12U to 42U, our innovative solutions to meet your demand for protection and security of your network equipment.

Various cabinet's mounting plates accommodate a variety of 15/25/35kV, 200A or 600A junctions. Four eye-bolts allow the line-person to simply hook-up the ...
