What trends are affecting the solar energy industry?

Detailed firmographic data, investment patterns, and regional hubs show emerging trends such as photovoltaics, electrification, and distributed solar power generation impacting the industry's future landscape. This report was last updated in July 2024.

How has the solar industry changed in 2022?

However, there has been a shift in the industry as more and more companies have started to produce other components to gain higher shares. For instance, in July 2022, Jinko Solar launched a residential energy storage system under the name of 'SUNTANK', which is a new solar battery.

What is the solar energy industry outlook 2024?

The Solar Energy Industry Outlook 2024 uses data from the Discovery Platform and encapsulates the key metrics that underline the sector's dynamic growth and innovation. The database contains over 3026 startups and 62500 companies, showcasing significant industry growth. This growth is evident from a 1.21% increase in the last year.

Which segment led the solar energy industry in 2021?

The new installation source segment led the industry in 2021 and held the maximum share of more than 96.95% of the global revenue. Solar energy technology is in its adoption phase and many countries are promoting the installation of solar energy systems for power generation.

Solar PV (photovoltaic) systems are a renewable energy technology that allows the utilization of solar energy directly from the sun to meet electricity ...

The 2024 Solar Energy Industry Report presents an analysis of the current trends, investments, and tech advancements shaping the global solar market. This report highlights the growth trajectory and ...

2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, ...

In recent years, solar power has proven to be a key solution for reducing dependence on fossil fuels and mitigating climate change. As costs decrease and efficiency increase, the future of ...
