What is a Megatron 1500V 373kwh Battery Cabinet?

MEGATRON 1500V 373kWh liquid-cooled energy storage battery cabinets are an integrated high energy density, long lasting, battery energy storage system. Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system.

What is a stationary battery energy storage system?

The stationary battery energy storage systems feature multi-level short circuit protection at the pack, rack, and container levels. Advanced BMS and sophisticated data algorithms ensure thermal stability across both pack and rack levels. Our systems feature 314Ah battery cells integrated into an IP67-rated battery pack design.

What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

Founded in 2009, SineSunEnergy has been focusing on lithium battery energy storage product development and application, providing leading lithium battery energy storage system integrated ...

The FPR-ESS-5015kWh-L-1500V is perfect for large-scale applications, including grid stabilization, renewable energy integration, and industrial power management.

This series of products integrates battery PACK, BMS system, high-voltage box, power distribution unit, temperature control system, and fire protection system. It is designed in a cabinet style, which is ...

373kWh rack systems can be paired with 1500V PCS inverters to complete fully functioning battery energy storage systems. The battery pack, string and cabinets are certified by TUV to align with ...

Founded in 2009, SineSunEnergy has been focusing on lithium battery energy storage product development and application, providing leading lithium battery ...

C& D Stationary Battery Cabinet offerings are designed to meet the latest UL standards. They feature an improved cooling profiles to maintain optimal battery life.

Introduce safe and efficient clean energy to achieve energy-saving, low-carbon operations and stable, secure performance for communication base stations.

This reference design fits stackable high-voltage battery energy storage systems used in large scale utility solutions, industrial and commercial UPS as well as storage for domestic use.
