Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage Systems (BESS) to support its rapidly ...

As a global energy storage platform provider, we offer fully integrated battery solutions, software, and services to optimize grid performance and enable the transition to cleaner energy ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of ...

Hyperion's first battery storage projects in Portugal, located in Estremoz and Vora. Co-located with solar PV plants, enabling energy to be stored during peak production hours.

As a global energy storage platform provider, we offer fully integrated battery solutions, software, and services to optimize grid performance and ...

Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility ...

Battery storage is now essential to ensure flexibility and resilience to electrical systems, supporting the growing incorporation of renewable energies. More than a technical statement, it is a ...
