Can bidirectional EVs be used as mobile storage?

In contrast to stationary storage and generation which must stay at a selected site, bidirectional EVs employed as mobile storage can be mobilized to a site prior to planned outages or arrive shortly after an unexpected power outage to supplement local generation or serve as an emergency reserve.

Can bidirectional electric vehicles be used as mobile battery storage?

Bidirectional electric vehicles (EV) employed as mobile battery storage can add resilience benefits and demand-response capabilities to a site's building infrastructure.

What is bidirectional charging & why is it important?

Bidirectional charging unlocks resilience benefits of EV batteries, offers demand-response capabilities, and can decarbonize backup power. Through V2G, bidirectional charging could be used for demand cost reduction and/or participation in utility demand response programs as part of a grid-efficient interactive building (GEB) strategy.

What is a bidirectional EV?

A bidirectional EV can receive energy (charge) from electric vehicle supply equipment (EVSE) and provide energy to an external load (discharge) when it is paired with a similarly capable EVSE.

The technology enables charging the batteries of electric vehicles and transferring the stored energy back to the stationary storage system in the ...
