What is the Big Canberra battery project?

Installation is underway on behind-the-meter batteries at nine sites. The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes the installation of: installation of behind-the-meter batteries at nine government sites.

How much power will the Big Canberra battery deliver?

The Big Canberra Battery will be capable of delivering 250 MW of power - more than a third of Canberra's peak electricity demand. It will be able to deliver this power for two hours. The Big Canberra Battery will have 500 MWh of capacity, which on a single charge could supply 23,400 households with their daily energy use.

What is the Big Canberra battery transformer?

This stored energy will be used to support our electricity grid. The Big Canberra battery transformer was delivered to the Williamsdale site in early September 2025. The transformer ensures electricity stored in the battery is converted to the correct voltage to be safely supplied to the grid.

How many jobs will the Big Canberra battery create?

The Big Canberra Battery will have 500 MWh of capacity, which on a single charge could supply 23,400 households with their daily energy use. Approximately 180-200 jobs will also be created through the project. More batteries for Canberra

Samsung C& T Renewable Energy Australia is seeking federal approval for a 200MW battery energy storage system (BESS) project located near Townsville, Queensland.

The ACT Government has reached a major milestone in its work to future-proof Canberra's energy supply. The development application has been ...

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

The developer has also expanded its battery storage capabilities, with the commissioning of its first solar-plus-storage project in Queensland and the ongoing construction of the 100MW/200MWh ...

The government of the Australian Capital Territory (ACT) has partnered with developer Eku Energy to deliver

its flagship Big Canberra Battery project. The government announced this ...

The 200MW/400MWh energy storage project in East China, where Kehua provides PCS energy storage solutions, has been connected to the grid. The project is located in Shandong Province, and is the ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid demand, and ...

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar ...
