Which countries are leading data center expansion in Central & Eastern Europe?

The "Central & Eastern Europe Existing & Upcoming Data Center Portfolio" database has been added to ResearchAndMarkets.com's offering. Romania leads the CEE region in data center expansion, accounting for over 40% of upcoming rack capacity. Poland and Russia also demonstrate strong development pipelines, particularly in IT power capacity.

Are data centres available in Europe?

The International Energy Agency's (IEA) Energy and AI Observatory recently published a report on data centre availability in Europe, covering both existing and planned facilities.

Are Europe's data centres underserved?

Central and Eastern Europe remain underserved by data centres, despite favourable conditions, a new mapping tool shows. Now, as the European Union prepares to invest EUR20 billion in artificial intelligence (AI) gigafactories, Poland and the Baltics are pushing to secure investment and strengthen the region's digital sovereignty.

Central and Eastern Europe remain underserved by data centres, despite favourable conditions, a new mapping tool shows.

Russia dominates the existing market with a power capacity of more than 665+ MW driven by major players like Rostelecom, IXcellerate, ATOMDATA (Rosatom). ...

More than 1,421 MW of total data center capacity is currently operational across Central & Eastern Europe, with 140 operators managing 283 facilities. By 2029, 29 upcoming data centers are ...
