In thermal-storage photovoltaic-concentrated solar power (PV-CSP) systems, the fluctuant part electricity is stored in thermal energy storage (TES) system instead of high-cost batteries.

The aim of the project was to design a techno-economically optimal PV-system at The University of Prishtina and to investigate the potential technical, social and economic impacts of ...

The aim of the project was to design a techno-economically optimal PV-system at The University of Prishtina and to investigate the potential technical, social and economic impacts of implementing PV ...

Summary: Explore the latest trends in Kosovo's power storage module market, including price analysis, renewable energy integration strategies, and actionable insights for businesses ...

This study analyzes the energy performance of various photovoltaic (PV) and photovoltaic thermal (PVT) panels in Kosovo's climatic conditions, focusing on a case study at the University Clinical Center in ...

This study analyzes the energy performance of various photovoltaic (PV) and photovoltaic thermal (PVT) panels in Kosovo's climatic conditions, ...

The Compact project is a key factor in enabling Kosovo's energy transition through capacity building for energy storage, workforce development, and increased representation of women ...

Summary: Explore the latest trends in Kosovo's power storage module market, including price analysis, renewable energy integration strategies, and actionable insights for businesses seeking affordable ...
