In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

Soon after state-owned Electricity Authority of Cyprus (EAC) launched a tender for a contractor for two BESS facilities, a private firm received a green light from the Department of ...

Modern 30kW systems combine lithium-ion batteries with enough smart tech to make your smartphone jealous. Recent MIT research [8] shows these units now achieve 95% round-trip ...

The first energy storage system, 30 kW/50 kWh, was connected to the electricity system in Nicosia in 2018. Cyprus became the testing ground for an innovative community project delivered by a German ...

Operated by the University of Cyprus, this is the country's largest battery project to date and the first of its kind at this scale. The BESS is ...

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and ...

The liquid-cooled energy storage system integrates the energy storage converter, high-voltage control box, water cooling system, fire safety system, and 8 liquid-cooled battery packs into one unit. [pdf]

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and ...
