What is a 250 kW harmonic neutralizer?

250 kW modules come standard with an embedded 12-pulseharmonic neutralizer,ensuring low total harmonic distortion (THD). Even higher quality AC waveforms are available with an external additional 500 kW 24-pulse or 1000 kW 48-pulse harmonic neutralizers,designed and manufactured exclusively by Magna-Power for its MT Series products.

What is a magnadc programmable DC power supply?

All MagnaDC programmable DC power supplies utilize high-frequency IGBT- and MOSFET-based power processing in a current-fed topology. This topology adds an additional stage over the conventional voltage-fed topology for enhanced control and system protection,ensuring that even under a fault condition,the power supply will self-protect.

Where are magnadc programmable DC power supplies made?

MagnaDC programmable DC power supplies are designed and manufactured at Magna-Power's 73,500 sq-ft vertically integrated USA manufacturing facility in Flemington,New Jersey. From raw materials to the completed product,Magna-Power has insourced nearly the entire production process to maintain complete control of quality,cost, and build-time.

What interfaces are available for magnadc power supplies?

MagnaDC power supplies include RS232communication interface standard with optional LXI TCP/IP Ethernet (+LXI) and IEEE-488 GPIB (+GPIB) options. SCPI Command Listing Using the rear User 37-pin I/O connector,the MagnaDC power supplies can be completely controlled and monitored using external signals.

Made of standardized containers, it is suitable for outdoor use, ensuring easy transportation, noise reduction and weather resistance, thus providing reliable power supply solutions for ...

V2G enables bidirectional energy flow between electric vehicles and the power grid, allowing electric vehicle owners to charge during off-peak hours and discharge during peak hours to take advantage ...
