Is solar energy a beacon of hope for Yemen?

In a country long plagued by power shortages,solar energy is emerging as a beacon of hope. Yemen,widely regarded as the Middle East's least electrified nation,is now benefiting from its first large-scale solar plant,which is helping restore power to tens of thousands of households in Aden.

Does Yemen have a solar power plant?

Yemen, widely regarded as the Middle East's least electrified nation, is now benefiting from its first large-scale solar plant, which is helping restore power to tens of thousands of households in Aden. The Aden Solar Power Plant, a 120-megawatt facility funded by the United Arab Emirates, began operations in July 2024.

Is solar a stopgap for Yemen?

For Yemen,solar is more than a stopgap. It could form the foundation of a rebuilt energy system that is cleaner,more resilient,and less dependent on imported fuels. If the expansion plan succeeds and output scales,Yemen may begin to reverse decades of decline in electricity access.

What percentage of Yemen's electricity comes from solar?

In 2023,solar accounted for just 10.4%of Yemen's total electricity output,according to the International Energy Agency. That share is expected to climb as the Aden plant's operators plan a second phase in 2026 that would double the facility's capacity.

Considering this, UNDP carried out a feasibility analysis and needs evaluation for the UNDP Yemen County Office in Sanaa. Colleagues across the world were consulted, and ...

Yemen, widely regarded as the Middle East's least electrified nation, is now benefiting from its first large-scale solar plant, which is helping restore power to tens of ...

The ambition is to become one of the world's top green hydrogen producers by 2050. On a smaller scale, one option to explore is systematic installation of solar canopies on parking lots.
