What are the requirements for the xstorage compact ESS installation?

The xStorage Compact ESS installation requires a TN-S,TN-C-S,TN-C or TT power distribution system. The ESS installation must meet the following guidelines: The system must be installed on a level floor. The floor must be suitable for heavyweight and wheeling.

How do I attach a battery pack to the ESS cabinet?

Tighten the cover screw. Attach PE cables between each battery pack and the battery rack. PE cabling of battery packs cannot be chained. Each pack must have a separate 16 mm² PE cable to the frame. The tightening torque is 10 Nm. To gain access to the terminal blocks,remove the screws securing the gland plates of the ESS cabinet.

How to handle a battery pack & ESS unit?

The battery packs and ESS units are heavy. Wear safety shoes and preferably use an adequate machine lifter for handling operations. It is recommended that at least two persons work together for all handling operations such as loading, lifting, moving packed units through the warehouse, and also delivery and unloading.

What is the ambient temperature limit for xstorage compact ESS?

Excessive amount of dust in the operating environment of the xStorage Compact ESS may cause damage or lead to malfunction. The allowed ambient temperature range for the system is from 0 °C to +35 °C(+30 °C for Gen1 batteries). The ambient temperature must not exceed 35 °C, especially for 10 or more consecutive days.

The purpose of this manual is to ensure safe operation during installation, ensure the quality of equipment installation, ensure construction progress and promote installation technology.
