What are HVAC outdoor Telecom enclosures & cabinets?

AZE's HVAC outdoor telecom enclosures and cabinets are designed specifically to protect high density installations of network equipment in outdoor environments and are ideal for wireless, wireline, and utility and applications.

What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Do you need a seismic enclosure?

Certain environments require extra protection for rackmounted equipment. Whether your venue is earthquake-prone or subject to regular vibration, such as an airport or factory, a seismic enclosure may be the answer for keeping equipment safe. Eaton Seismic Cabinets are performance-tested to EIA-310-E, Seismic Zone 4 (NEBS GR-63-CORE) standards.

What is a telecommunication enclosure?

A telecommunication enclosure is a protective cabinet or box designed to house and safeguard telecommunications equipment such as routers, switches, and cabling systems.
