-----  
What services are included in a solar PV contract?

The services included by the contractor shall include operation and maintenance of all components of solar PV systems for the life of the contract, as detailed herein.

What types of electrical plans are included in a PV system?

Electrical Plans, including single-line electrical diagrams showing utility interconnection and all devices comprising the PV system, including, but not limited to: PV arrays, combiner boxes, circuit breakers, disconnect switches, inverters, meters, timers, control devices, and other equipment comprising the complete system.

Can a PV system be included in a future micro-grid?

In addition to connecting and operating in a grid-interactive mode, the Contractor's proposed PV system shall be capable of being included in a future micro-grid that can operate when the utility grid is unavailable. This micro-grid could include conventional (engine) generators, other renewable resources, and/or energy storage.

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be directed towards tools, resources, and sample ...

Promote common and good practices in federal sector renewables procurements that are recognized by the developer and project finance community. Template sections are divided by subject. Background ...

The Revolutionary FAR Overhaul (RFO) is streamlining the FAR to its statutory roots and to policies necessary to support sound procurement. The effort will result in changes ...

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...
