Who makes EPC power?

EPC Power is proudly powered by Americaningenuity. Our power conversion systems are designed,engineered,and manufactured in the USA using high-quality components. Since our founding in 2010,we have quickly become the premier manufacturer of utility-scale power inverters in North America.

Why should you buy power from a renewable generation site?

Purchasing power directly from a renewable generation site allows customers to support renewable energy adoption and the clean energy transition. Publicly traded companies can tout their clean energy purchases that help enhance their public image. In addition to securing long-term price structures,PPAs help organizations reduce energy risk.

What are the risks of a long-term energy purchase agreement?

Market Risks: Long-term Purchase Agreements lock in energy prices,which can become unfavourable if market prices drop significantly,leaving buyers paying more than the market rate. If a buyer's energy needs decrease,they may end up purchasing more energy than required,resulting in financial losses.

What is a cab1000 inverter?

The CAB1000 is a versatile,high-density energy storage platformdesigned for quick and easy deployment. Our grid-tied inverters offer high performance and reliability for commercial,industrial,and utility-scale solar projects. CAB1000: Simple. Reliable. Powerful.
