Who can install energy-generation & storage property?

Tax-exempt and governmental entities, such as state and local governments, Tribes, religious organizations, and non-profits may install energy-generation and storage property to meet energy demands, reach clean energy transition goals, or save money on energy costs.

Does the OBBBA restrict foreign investment in solar energy projects?

It did not, however, limit such arrangements for qualified solar electric property. The OBBBA imposes new restrictions on foreign involvement in clean energy projects, including restrictions on ownership, control and material assistance. These restrictions are discussed further below.

What is a one-megawatt exemption?

The one-megawatt exception may also apply to qualified projects under section 48 with a maximum net output of less than one megawatt of thermal energy; and to energy storage technology under section 48E with a capacity of less than one-megawatt. Credit is increased by 10% if the project meets certain domestic content requirements.

What tax deductions are available for energy efficient building retrofit property?

A new alternative deduction for energy efficient building retrofit property is also available. For producing qualified clean hydrogen at a qualified clean hydrogen production facility during the 10-year period beginning on the date the facility was originally placed in service. Extends tax credits for biodiesel and renewable diesel.

There are three main types of MES systems for mechanical energy storage: pumped hydro energy storage (PHES), compressed air energy storage (CAES), and ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids.

Storage projects that start construction before 2033 will remain eligible for both the ITC and PTC. Those beginning in 2025 can receive an ITC of up to 50% under 48E if domestic content ...

As the photovoltaic (PV) industry continues to evolve, advancements in energy storage projects three exemptions and three halvings have become critical to optimizing the utilization of renewable energy ...
