What are Estonia's ambitious energy goals?

Estonia's ambitious targets require accelerated renewables deployment, increased electrification and phasing out oil shale generation while ensuring a just transition that maintains energy affordability and supports economic development in the oil shale region.

How is Estonia ensuring regional gas security?

Estonia has taken steps to ensure regional gas security while working to reduce its gas demand and decarbonise its gas supply. Natural gas plays a relatively minor role in Estonia's energy system and is used mostly for heating.

How will EU ban on wood imports affect Estonia's forestry industry?

The European Union ban on wood imports from Russia could increase demand for Estonia's forestry energy products (40% of which were exported in 2021), potentially increasing prices and reducing domestic availability. Measures to boost LULUCF carbon absorption could reduce the availability of biomass for energy.

Why should Estonia invest in phosphate deposits?

Estonia also has large phosphate deposits that may contain other critical minerals and present an opportunity for Estonia to support the energy transition and expand its economy, with the potential to use skills and expertise from the oil shale industry.

It highlights international best practices relevant to Estonia and details areas where Estonia's leadership can assist other countries with their energy sector challenges.

The Estonian government's decision to delay offshore wind energy auctions and cancel the EUR2.6 billion support plan, along with measures for the energy storage facility, has raised concerns among ...

The objective of the measure is to carry out a pilot programme on renewable energy storage in Estonia. The knowledge acquired in this pilot programme is expected to provide a basis for the ...

Energy storage can be made more cost-effective for households through lower network charges. Lowering or completely eliminating network charges for battery storage ...

At the moment, the Paldiski project is the only long-term storage option for the Estonian government. An
