What is a telecommunications enclosure?

Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments. These purpose-built cabinets are engineered to protect susceptible telecommunications equipment, such as routers, switches, power supplies, and network components, from environmental elements and potential security threats.

What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

Why do you need a telecom enclosure?

Provide complete protection and security for your telecoms equipment with steel enclosures and GRP cabinets by the Eldapoint Group. Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments.

What materials are used in telecommunication enclosures?

A choice of aluminium or steel panels or GRP with ply core. Our enclosures comply with industry standards and regulations, ensuring that telecommunication equipment housed within meets safety and performance requirements. We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel.
