-----

China has announced new export control measures targeting a wide range of lithium battery technologies, materials, and manufacturing ...

China tightens export controls on high-density lithium batteries, key materials, and manufacturing equipment to safeguard national security and technological advantages, ...

Battery storage has many uses in power systems: it provides short-term energy shifting, delivers ancillary services, alleviates grid congestion and ...

In recent years, the energy storage battery export sector has emerged as a critical pillar of the global renewable energy transition. This article analyzes key market trends, regional demand hotspots, and ...

China has announced new export control measures targeting a wide range of lithium battery technologies, materials, and manufacturing equipment. The controls cover three major ...

From American solar farms to European microgrids, these “power banks for civilization” are reshaping how nations store and manage renewable energy. While Western ...

Due to increases in demand for electric vehicles (EVs), renewable energies, and a wide range of consumer goods, the demand for energy storage batteries has increased ...

According to Reuters, China's lithium-ion battery exports reached record levels in the first ten months of 2025, driven largely by surging demand for stationary energy storage systems, official ...
