Is a 20kW solar power system a good investment?

A 20kW Solar Power System for your business is an advantage as it reduces your electricity bills to a considerable extent and also reduces your dependency on the power supply from the grid. It is also considered as a long-term investment as the average life cycle of a solar power system is considered to be between 10-15 years.

What solar financing options are available in 2025?

Read more about the different solar financing options available. In 2025, solar.com Energy Advisors typically recommend using a solar loan to finance a solar system -- if the homeowner can efficiently monetize the 30% federal tax credit. If they can't, then a solar lease or PPA is the best option.

Should you get a solar loan or a PPA in 2025?

In 2025, solar.com Energy Advisors typically recommend using a solar loan to finance a solar system -- if the homeowner can efficiently monetize the 30% federal tax credit. If they can't, then a solar lease or PPA is the best option. Want to see your solar savings potential?

Should I pay for my solar investment in cash?

Given the relatively high interest rates, solar.com recommends homeowners pay for their solar investment in cash if they can. This will achieve the lowest value of solar power possible and is a safe place to invest money in an otherwise highly volatile market. But, for homeowners who are looking to finance their solar, what are the best options?
