How do I scale my energy storage?

Easily scale your energy storage at the pack level with 7 Packs at 64 kWh to 15 Packs at 138 kWh. Increase energy storage at the rack level by utilizing multiple ATEN Racks connected together for larger energy storage systems. The ATEN LFP Battery Rack is the Building Block to all ATEN Series BESS Battery Energy Storage Systems.

What is a great battery rack?

When used in AGreatE's BESS systems (64 kWh to 138 kWh with a rated voltage of 358 V to 768 V) these Battery Racks can be stacked limitlessly to create the specific storage size your project needs. The difference is clear, get better results with the ATEN Pack and Rack system.

Do Aten racks come with a battery energy storage system?

All ATEN Racks come with a Battery Energy Storage System(BESS) Controller and High Voltage Unit (HVU) Power Supply. The BESS Controller allows for the monitoring of the battery cells within the rack as part of the overall battery management system (BMS).

Why should you choose a data center rack?

The racks are engineered to be easy to stack in rows, and to be highly customizable in order to cater to the unique needs and environment of each data center. Each one features a split-rear-door design, which reduces the amount of space required for hot aisles, and which also makes the already-easy maintenance even simpler.

RackSolutions" server racks range from 0-50 inches. The average depth for a server rack is about 36". On top of making sure there is enough depth for your equipment, make sure that any rails ...

Delta manufactures a 42U rack system to suit the needs of nearly any business, regardless of its size, industry, or application. These modular racks are a breeze to install, to upgrade, and to maintain.
