-----

One plausible scenario is existence of another future grants that are assigned on schema level to different role. In such situation future grants assigned on the database level ...

Unlike `std::future`, which is only moveable (so only one instance can refer to any particular asynchronous result), `std::shared_future` is copyable and multiple shared future ...

The error: `SyntaxError: future feature annotations is not defined` usually related to an old version of python, but my remote server has Python3.9 and to verify it - I also added it in my ...

If the future is the result of a call to `async` that used lazy evaluation, this function returns immediately without waiting. The behavior is undefined if `valid ()` is false before the call ...

The `get` member function waits (by calling `wait ()`) until the shared state is ready, then retrieves the value stored in the shared state (if any). Right after calling this function, `valid` ...

? React Router Future Flag Warning: The revalidation behavior after 4xx/5xx action responses is changing in v7. You can use the `v7_skipActionErrorRevalidation` future ...

? React Router Future Flag Warning: The revalidation behavior after 4xx/5xx action responses is changing in v7. You can use the `v7_skipActionErrorRevalidation` future flag to opt-in early.

If the future is the result of a call to `async` that used lazy evaluation, this function returns immediately without waiting. The behavior is undefined if `valid ()` is false before the call to this ...
