How much does Germany spend on EV and stationary battery research?

Public research and development incentives for EV and stationary battery research amount to between EUR 80 million and EUR 85 million every year. As the European lead market in the energy transition age, Germany provides the opportunity for companies to develop, test, define and market new energy storage solutions.

Is Germany a good place to invest in energy storage?

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing industry. The country stands out as a unique market, development platform and export hub.

Why is Germany a good place to study energy storage?

Germany boasts a dense landscape of world-leading research institutes and universities active in the energy storage sector. They work closely together with industry to bring innovations to the market. The federal government supports research and development in the energy storage, hydrogen, fuel cell, and electric vehicle sectors.

How much will German companies invest in Hydrogen mobility in 2024?

Around 300 German companies - from the automotive and supplier industries, utility providers, specialty chemical industry, and machinery and equipment producers - have plans to invest more than EUR 2 billion through to 2024 in order to activate the market for sustainable, secure and economic hydrogen mobility.
