---

The two companies have worked together to lay the groundwork for providing up to 20,000 Hamburg households with carbon-neutral heat and avoiding up to 100,000 t of CO2 emissions in the ...

In Germany, more and more homeowners are currently undergoing their private energy transition: with a solar system on the roof, battery storage and a heat pump in the basement - and perhaps a wallbox ...

In Germany, more and more homeowners are currently undergoing their private energy transition: with a solar system on the roof, battery storage ...

It works a bit like a thermos, and the heat is released into Hamburger Energiewerke's over 860-kilometer-long city network when needed. The project received ...

The electro-mechanical battery storage project uses compressed air storage storage technology. The project was announced in 2010 and will be commissioned in 2013.

Discover how Hamburg's cutting-edge energy storage solutions are reshaping renewable energy integration and grid stability. This article explores the technical innovations, environmental ...

The 130MWh Electric Thermal Energy Storage (ETES) demonstration project, commissioned in Hamburg-Altenwerder, Germany, in June 2019, is the precursor of future energy storage solutions ...

The ETES (electric thermal energy storage) pilot plant in Hamburg, Germany -- at the site of a decommissioned conventional power plant -- converts electrical energy into hot air using a ...
