To strengthen grid stability, the government will upgrade the SCADA system and deploy 200MW of battery energy storage capacity by 2030 at critical grid locations.

This licence according to Section 21 of the Act permits the licensee to store renewable energy products in commercial quantities and also, install a facility for the storage of the renewable energy product.

Ghana Power Generation Company (GPGC) aims to improve the security of power supply in Ghana with solutions that complement the Government of Ghana's efforts to increase generation capacity.

Two significant issues emerge from Ghana's power generation subsector - critical decisions on fuel supply and issues surrounding excess generation capacity. The assessment of these issues is ...

Incorporating Genser's projected natural gas consumption into the anticipated natural gas demand by power plants in 2025, an annual average of 369 MMscfd of natural gas is expected ...

Incorporating Genser's projected natural gas consumption into the anticipated natural gas demand by power plants in 2025, an annual average of 369 MMscfd of natural gas ...

Summary: Ghana's growing energy demand requires robust power supply side energy storage solutions. This article explores current challenges, proven technologies like battery storage systems, and how ...

The integration of emerging technologies, such as smart grid solutions, energy storage systems, and regional power interconnections, offers opportunities for a sustainable and reliable ...
