Are mobile energy storage systems NFPA 855 compliant?

When charging and storing a mobile energy storage system, the requirements are relatively straightforward. The system should be treated as a stationary system as far as the requirements of NFPA 855 go. These requirements will vary based on whether the system is being stored indoors, outdoors, on a rooftop, or in a parking garage. In-transit

What is a mobile energy storage system?

An energy storage system contains a large amount of energy stored in a small space, which may make it the target for those who look to cause harm. For this reason, a deployed mobile energy storage system is required to be provided with a fence with a locked gate that keeps the public at least 5 ft (1.5 m) away from the ESS.

Can bidirectional electric vehicles be used as mobile battery storage?

Bidirectional electric vehicles (EV) employed as mobile battery storage can add resilience benefits and demand-response capabilities to a site's building infrastructure.

Are mobile energy storage systems ready for a 2023 New Year's Day fire?

Mobile energy storage systems are being deployed in jurisdictions around the world, and--as demonstrated by a 2023 New Year's Day mobile energy storage system fire --accidents can happen. We want to make sure communities are prepared for when these systems are deployed in their backyard.
