What is solar-plus for Electric Co-ops?

Solar-Plus for Electric Co-ops (SPECs) was launched to help optimize the planning, procurement, and operations of battery storage and solar-plus-storage for electric cooperatives. SPECs was selected by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) for Round 2 of the Solar Energy Innovation Network (SEIN).

What are the challenges of procurement for utility-side storage & solar-plus projects?

The challenges of procurement for utility-side storage and solar-plus projects center largely on early-stage decisions: defining the top-priority use case, but also exploring ways to get more value out of the project and to prepare for market changes over its life.

What is the most cost-effective combination for a solar power system?

In this case, the most likely cost-effective combination would be 2 MW PV, with 2 MW battery capacity, and 4 hours of storage duration--i.e., an 8 MWh BESS. Caution: This assessment is based on only one value stream (demand reduction).

What is a solar power purchase agreement (PPA)?

A solar power purchase agreement (PPA) is a financial contract in which a third-party developer owns, operates, and maintains the photovoltaic system, and a customer agrees to purchase the system's electric output from the solar services provider for an agreed-upon price and for a predetermined period.

With projects like State Grid Gansu's 291kWh solid-state battery cabinet procurement (&#165;645,000 budget) [1] and Southern Power Grid's 25MWh liquid-cooled cabinet framework tender ...

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

Below is a sample search result showing the newly published government contracts and bids in renewable, solar and wind energy. These include government RFPs, RFTs, RFIs, RFQs in ...

Mobile energy storage containers are revolutionizing military and defense operations by providing reliable, scalable, and portable power solutions. These advanced systems, including energy ...

operations of battery storage and solar-plus-storage for electric cooperatives.

NV Energy's contract with Google for 350 MW solar plus 250-280 MW co-located battery storage demonstrates an innovative procurement approach to stacking customer-specific benefits with ...

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be ...

Highjoule's Outdoor Photovoltaic Energy Cabinet and Base Station Energy Storage systems deliver reliable, weather-resistant solar power for telecom, remote sites, and microgrids.
