November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power ...

Greece's renewable success story centers on two technologies perfectly suited to its geography: solar photovoltaics and wind power. With 2,500+ hours of sunshine annually --compared ...

Greece has made substantial strides in its solar energy infrastructure. By the end of 2023, operational solar photovoltaic (PV) capacity reached 8.1 GW, making it the eighth-largest solar ...

One of the most used energy sources in Greece is undoubtedly the solar one. In fact, thanks to its position, the country can count on a large exposure, which allows it to exploit a large ...

Energy Minister Kostas Skrekas said that Greece took first place among European countries last year in the participation of solar power in its total energy mix. In ...

Energy Minister Kostas Skrekas said that Greece took first place among European countries last year in the participation of solar power in its total energy mix. In 2022, Greece saw record activity in the ...

Greece installed a record 2.572 GW of PV capacity in 2024, about 1 GW more than the previous year. In 2023, the country added 1.59 GW of PV capacity. The ...

Greece has overtaken the Netherlands to become Europe's solar PV leader, with 19% of its electricity coming directly from the sun in 2023, according to data collated by Ember.
