-----

An advanced BIM model of the entire city of Helsinki, Finland, is being used by authorities to calculate the solar potential of around 80,000 ...

The Pajam&#228;ki Solar System Scale Model is a scale model of the Solar System built in Helsinki and partly in Espoo, Finland in 1992. Its scale is 1:1 000 000 000, i.e. one to one billion, so that 1 millimeter in ...

The mySMARTLife project aims at making the three lighthouse cities of Nantes, Hamburg and Helsinki more environmentally friendly by reducing the CO2 emissions of cities and increasing the use of ...

Along the border of Helsinki and Espoo, you can find a solar system model that gives you an idea of how far the different planets are from each other and from the Sun.

Pajam&#228;ki Solar System Scale Model is a scale model of the Solar System built in Helsinki and partly in Espoo, Finland in 1992.

A dataset describing the roofs in Helsinki and their yearly total solar irradiation is used to test and validate the model. Finally, the costs associated with the optimal allocations analysis are analyzed ...

Ursa Astronomical Association and City of Helsinki have planned and set up the model of the solar system in Helsinki. The scale is 1 : 1 000 000 000 ...

An advanced BIM model of the entire city of Helsinki, Finland, is being used by authorities to calculate the solar potential of around 80,000 buildings as part of a bid to meet ambitious energy ...
