What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

What is a minifort & small telco enclosure?

Compact Network Deployments: The MiniFort and Small Telco enclosures provide secure termination and equipment housing for smaller installations, requiring pole, ground, or wall mounting with minimal footprint. Flexibility defines every telecom cabinet we manufacture.

We provide superior outdoor enclosures that are ready for installation. Fill out our registration form or call us at 904-674-2976 to learn more about our products and customization services.

Charles Universal Broadband Enclosures (CUBE) are constructed to withstand the elements and provide superior protection for active electronics in all environments.

Available in NEMA 3R, 4, and 4X configurations, the WOD-62DXC ensures reliable performance in extreme conditions, including heat, cold, wind, rain, and ice. ...

Frigate's EMI-shielded, thermally optimized enclosures support mission-critical telecom systems. Frigate uses FEA, high-strength alloys, and precision welding to ensure enclosures withstand vibration, ...

AZE's weatherproof Outdoor Enclosures provide durable, corrosion-resistant protection for energy, telecom, and industrial applications. Customizable, NEMA-rated, and built for harsh environments.
