What is a hotel electrical installation?

Electrical installations are the main source of power for hotel systems- lighting, sockets, power and process consumers, etc. They "bring to life" the processes which create comfort for guests as well as a healthy and efficient working environment for employees. Some of the types of electrical systems we offer:

How does a hotel electrical system work?

Larger hotels are provided with in-house substation, sometimes built into the building itself. Its type, parameters and location are determined in the electrical design. It consists of a 20kV switchgear to which the external 20kV supply cables are connected, a power transformer, and a low-voltage electrical panel (LVP).

What equipment does a hotel need?

Every hotel has a significant number of power equipment - such as chillers, indoor convectors, ventilation systems, kitchen appliances, bar appliances, spa appliances, etc. Each of these must be supplied with electricity by a suitable electrical cable from the electrical switchboard.

What is a telecom cabinet?

The cabinets are designed to meet challenging requirements for indoor telecom and Industrial applications, with special focus on cable management and multi-cabinet installation, with or without back up batteries.

Flexibility: The cabinets can be used as stand alone, or several cabinets can be fitted together side by side.

A variety of electrical installations with specific applications are built to ensure the appropriate functioning of hotel complexes by creating ...

Learn about the common voltage standards in Spanish hotels and potential socket rental fees to help travelers prepare in advance.

A power efficient design is required that supplies both the higher voltage analog circuits and multiple tightly regulated low-voltage supplies for the high-speed digital communications ASICs and FPGAs.

Specific circuits can be designated to remain on to supply power to air conditioners, mini-bars or power stations. This system is designed specifically to reduce energy consumption while guaranteeing the ...

They feature power supply, distribution, and protection equipment as well as radio systems and passive or active cooling. Contact us today to learn about all the options and to find a solution that is right for ...
