Should I get a climate controlled storage unit?

You should consider getting a climate controlled storage unit if you have items you'd like to protect from the weather and humidity. Non-climate rooms are perfect for items that you would store in your basement,garage or shed.

What is a climate controlled storage unit?

While some outdoor or drive-up storage locations may offer climate controlled units,they are most commonly found in our one or multi-story storage buildings. Because these units are located inside a building,they are kept at a comfortable temperate range between 65 and 85 degrees,just like your home.

Do you need a climate control unit?

However,items that are more delicate and sensitive to humidity and weathershould be stored in a unit that has climate control. These rooms provide a consistent temperature year round,protecting your belongings from extreme temperatures and harmful humidity. Impact On...

How does humidity affect a house?

Due to humidity, clothing and fabrics can begin to wear down and grow mold or mildew on them. Items can begin to lose their color when exposed to the heat and elements over time. Antiques, family heirlooms, and photos cannot be replaced. When exposed to the heat and elements, these items can lose their luster and value over time.
