Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.

What are the safety requirements for a lead accumulator?

ENERPOWER has developed a project that adapts to the safety criteria referred to by the current legislation CEI 21-6 / December 1990 for the installation of lead accumulators. Adequate natural ventilation (in the charging conditions indicated by ENERPOWER).

Where can I find the instruction manual for the batteries?

Inside the door there is a document pocket containing the instruction manual for the batteries. The sections can be fixed together to form a single cabinet. Where required, the cabinet is completed by a special compartment or switch/disconnector cubicle containing the protection equipment.
