How much does it cost to build a hydrogen station?

According to the analysis, \$200 million would be required for an infrastructure of 42 hydrogen stations in the LA Basin that supports 25,000 FCVs by 2017. This includes \$170 million for building the stations and \$30 million for operating them.

What is the hydrogen refueling station project?

The Hydrogen Fueling Infrastructure Research and Station project is one that leverages capabilities at the national laboratories to address the technology challenges related to hydrogen refueling stations.

What is the design of the hydrogen delivery station?

The design accommodates a tractor-trailer delivery for the liquid hydrogen as well as normal vehicle traffic flow. The layout adheres to the same restrictions on placement and width of driveways and structures as in the gaseous delivery station (see Figure 34).

Will KCEC get a green hydrogen project?

This financial award will bring to fruition the first green hydrogen project of this type done by an electric cooperative in the nation," said KCEC Board Chairman Bobby Ortega. "The KCEC Board and CEO have an innovative vision for the coop's future while delivering affordable, reliable clean energy to our members today and well into the future.

Now, Ortega and the Village of Questa are working with Kit Carson Electric Cooperative and other community organizations to build a green hydrogen plant in Questa.

Taos, NM - January 13, 2025 - Kit Carson Electric Cooperative (KCEC) has received \$231 million in investment funding for green hydrogen-driven power generation. The new renewable energy ...

To meet growing energy demand and local co-op members' priorities, KCEC and community leaders began examining the potential to use a former molybdenum mine and Superfund site ...

Kit Carson Electric Cooperative (KCEC) has reaffirmed that the planned Questa H2 and solar facility remains on track, following major planning, safety, engineering and environmental ...

To meet growing energy demand and local co-op members' priorities, KCEC and community leaders began examining the potential to use a former molybdenum mine and Superfund site in the Village of ...
