The wind farm is expected to be operational by early 2026, significantly boosting Laos' renewable energy capacity and supporting its goal of achieving renewable energy targets by 2030.

Looking to offer Laos a true alternative to hydroelectric power, I have put forward the idea of a 11,400 MW floating solar-with-storage system (FSS) on the 370 km<sup>2</sup> Nam Ngum reservoir - the biggest ...

Dynamic testing of the full-capacity 600 MW grid has been completed, with the project currently undergoing a 72-hour reliability running test and power quality test. Full-capacity commercial ...

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects.

Together with the Government of Laos, EDF signed a memorandum of understanding to undertake the feasibility studies for a Pumped Storage Hydropower project located nearby Nam Theun 2, with an ...

With 80% of its electricity already coming from renewables (mostly hydropower), Laos is now betting big on energy storage solutions to juice up its regional influence. But how did this ...

As the first wind farm in Laos and the largest in Southeast Asia, Monsoon has set a new benchmark by securing a bankable cross-border Power Purchase Agreement. In addition to ...

China General Nuclear, a state-owned power company, has recently signed an agreement with Laos to expand a significant renewable energy initiative in the northern region of the country.
