In 2017, the DPU approved 2 utility-scale battery storage demonstration projects for Eversource as part of its most recent base distribution rate case (Section X.C of D.P.U. 17-05). These 2 projects are both ...

The skyrocketing demand for energy storage solutions, driven by the need to integrate intermittent renewable energy sources such as wind and solar into the power grid effectively, has led to a flurry of ...

Yap State Public Service Corp. is seeking bids to supply solar minigrids with battery energy storage systems (BESS), totaling 79 kW, for Yap ...

The small island nation of Palau in the western Pacific Ocean has moved a step closer to having what is said to be the largest ever microgrid ...

Discover how liquefied natural gas (LNG) generators are transforming energy security in Micronesia while balancing environmental responsibility and operational efficiency.

Learn about cost drivers, innovative battery technologies, and practical solutions for island power systems - all while exploring opportunities to implement affordable, sustainable energy storage ...

To support large regions increasingly dependent on intermittent renewable energy, Stanford scientists are creating advances in fuel cells, hydrogen storage, flow batteries, and traditional battery cells for ...

Yap State Public Service Corp. is seeking bids to supply solar minigrids with battery energy storage systems (BESS), totaling 79 kW, for Yap Island in the Federated States of Micronesia....
