Why do I need an IP67 power supply?

Mounting the IP67 power supply on or closer to where power is needed reduces cable length and voltage drop that can occur with longer cables. With a dynamic power boost of up to 150% of the nominal current for up to 5 seconds, TRIO IP67 power supplies can provide the additional current needed for the starting of heavy or inductive loads.

What types of IP67 power supplies are available?

Currently, the TRIO IP67 power supplies are offered in single phase, 24V /8A and 24V /10A variants. The offerings include three different connection technologies: M12, 7/8", and IPD (Installation Power Distribution). These variations allow users to choose which connection best fits their application.

What are the benefits of a trio IP67 power supply?

The TRIO IP67 power supplies reduce or eliminate the need for a separate control enclosure which reduces overall system cost. Mounting the IP67 power supply on or closer to where power is needed reduces cable length and voltage drop that can occur with longer cables.

What is an IP67 polycarbonate enclosure?

IP67 Polycarbonate enclosure with a solid lid featuring metric knockouts for cable glands. The X6 is designed for electrical junction boxes, weatherproof IoT devices or sensory enclosures ...

The growth of the Latin America IP67 power supply market is primarily driven by increasing demand for durable and reliable power solutions in harsh environments.
