Designed as an advanced liquid cooled battery pack and liquid cooled lithium-ion battery solution, it provides superior thermal management, IP67 protection, and a long 8000-cycle lifespan.

Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection, modular BMS architecture, and long-lifespan lithium iron phosphate ...

High-efficient & cost-effective energy storage solution with high density of storage and release. Surpassing comparable products with identical energy levels, our module boasts a superior energy ...

The evolution of liquid-cooled battery modules is likely to shape the future of energy storage solutions. As societal push for renewable energy integration intensifies, the need for efficient ...

To achieve superior energy efficiency and temperature uniformity in cooling system for energy storage batteries, this paper proposes a novel indirect liquid-cooling system ...

High-energy LFP battery module with intelligent liquid cooling, $\leq 3^{\circ}\text{C}$ temperature difference, layered safety design, and fast maintenance for C& I and grid-scale energy storage.

They store electrical energy for later use, supporting grid storage, renewable energy systems, and electric vehicles. We offer different modules, such as a 5.12 KW residential ESS for home use and a ...

Ranging from 208kWh to 418kWh, each BESS cabinet features liquid cooling for precise temperature control, integrated fire protection, modular BMS ...
