Built at the Marseille-Fos Port, the marine geothermal power station Thassalia is the first in France, and even in Europe, to use the sea's thermal energy to supply linked buildings with power for heating and ...

We specialize in large-scale solar power generation, solar energy projects, industrial and commercial wind-solar hybrid systems, photovoltaic projects, photovoltaic products, solar industry solutions, ...

The Marseille energy storage model demonstrates how smart microgrids can balance environmental goals with economic practicality. As cities worldwide seek carbon-neutral solutions, this approach ...

The new 10.26MW plant - for which MLWC received a license from the Federal Energy Regulatory Commission (FERC) in December 2011 - will be built in the same location as the original Boyce ...

The H2V Marseille Fos project, launched in May, involves the construction of a massive green hydrogen unit. The project aims to reduce CO2 emissions by 800,000 tonnes a year, reinforcing carbon ...

GLASHAUS POWER - As Marseille positions itself as a Mediterranean hub for clean energy, its recent entry into large-scale energy storage systems signals a transformative phase.

Swiss power producer and energy service provider Alpiq has bought a 100-MW/200-MWh battery energy storage system (BESS) project in France from the local unit of UK renewables developer ...

As Europe accelerates its shift toward renewable energy, the Marseille Battery Energy Storage Station has emerged as a critical infrastructure project. Located in southern France, this facility is designed ...
