How is Mauritania affecting the energy supply?

Currently, the population growth is around 2,6% per year. All these transformations in Mauritania are affecting the energy consumption necessitating an evolution in the energy supply. Mauritania is mostly dependent on non-renewable resources (fossil fuels) and the access rate to the grid is pretty low.

Can Mauritania produce solar and wind energy?

Estimates for solar energy and wind energy production in Mauritania vary, but all recent studies agree that Mauritania has enormous potential for both solar and wind energy because of its unique geography.

Why should you invest in Mauritania?

Investing in Mauritania can offer a wide range of opportunities, particularly in the energy sector. With major gas discoveries and large-scale renewable energy projects in development, the country is poised for significant growth in this area.

What is Mauritania's strategic plan?

Mauritania, as outlined in Mauritania's ambitious three-step strategic plan for the future development of its petroleum, mines, and energy resources from 2022 to 2030.

The facility will combine 160 MW of solar and 60 MW of wind capacity, supported by a 370-megawatt-hour (MWh) energy storage system. Under the 15-year agreement, Ewa Green ...
