Why should India invest in a Bess storage facility?

With a significant increase in renewable energy generation capacity, it is imperative that storage facilities are developed to help India and the world transition to clean energy. With an annual tariff nearly 55% lower than the previous benchmark, the project sets a new standard for BESS affordability in India.

What is BSES Bess installation?

The BESS installation is engineered to support renewable energy integration into the distribution grid, enhance grid stability, manage peak demand, and fulfill ancillary power system needs. The project was awarded to IndiGrid in October 2023 by BSES Rajdhani Power Limited (BRPL).

What is Bess project?

The BESS project has been designed to integrate renewable energy into the distribution level grid system, facilitate grid stabilization, manage peak power demand, and address various ancillary needs. It will support in lowering power procurement costs and defer the need to upgrade the capacity at the Kilokari 33/11 kV power substation.

Who owns kilokari Bess Pvt Ltd?

As per the agreement, the special project vehicle housing the project -- Kilokari BESS Pvt Ltd -- will be paid by BRPL through a fixed-capacity tariff (in Indian Rupees/MW/month terms), on availability basis irrespective of the actual consumption. The SPV itself is owned by IndiGrid and Ampere-hour Energy.
