Many of you will be aware that the former West Carleton Township, now a part of the City of Ottawa, has been fighting the approval of a Battery Energy Storage System (BESS) for many ...

Ottawa city councillors have supported a staff recommendation to bar the installation of new solar, wind and bioenergy production facilities -- for now -- as the city explores how best to zone...

In a letter appearing in Ottawa local news service West Carleton Online today, resident Leigh Fenton lays bare all the flaws in the approval ...

Currently, the use of bulk energy storage by batteries increases the cost of delivered electricity by 10 times the cost of the renewable generation itself. We have to ask if the citizens of ...

According to Ottawa, the province regulates electricity generation supplies but municipalities have authority over new proposed renewable energy ...

BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in ...

BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand. They are used to ...

The facility, called the Skyview 2 Battery Energy Storage System, will be built in the community of Edwardsburgh/Cardinal, approximately 80 kilometres south of downtown Ottawa.
