Riding Sunbeams is a world-leading innovator, focussed on decarbonising rail traction networks through the development and connection of solar, wind and ...

Swiss startup Sun-Ways has launched the world's first removable solar power plant on active railway tracks, with passenger trains set to run over the 18 kW installation starting April 28.

Thanks to its patented technology, Solar-Ways system integrates renewable energy production into railway infrastructures. Due to its flexibility and adaptability, the device makes it ...

Solar railways involve the strategic installation of photovoltaic (PV) panels along railway tracks to harness solar energy directly into the rail transport ...

Switzerland has achieved a world-first by launching a removable railway photovoltaic system. This remarkable innovation comes from the Swiss startup Sun-Ways, which has installed 48 ...

Riding Sunbeams is a world-leading innovator, focussed on decarbonising rail traction networks through the development and connection of solar, wind and energy storage assets.

California is developing the nation's first fully solar-powered high-speed rail system. A 540-acre solar farm will supply approximately 35 megawatts of electricity, stored in 140 MWh battery ...

Swiss startup Sun-Ways has launched the world's first removable solar power plant on active railway tracks, with passenger trains set to run over ...
