What are the opportunities for battery energy storage systems in Latin America?

The opportunities for battery energy storage systems are growing rapidly in Latin America. Below are some key details for those who want to understand and succeed in the BESS market. In 2010, the IEA projected that the world would reach its 2019 solar penetration only in 2035. Analysts underestimated solar adoption by 16 years.

How much battery capacity will Latin America have by 2023?

While the U.S. was expected to have nearly 60 GWh of installed battery capacity by the end of 2023, AMI estimates that Latin America had less than 1 GWh of operational BESS projects--a 60x difference. This large gap will be bridged at different speeds based on each country's specific regulations.

Are BTM assets regulated in Mexico?

Although there is no regulation against BTM assets, there is also no framework that allows it to be done. Hence, the project is much riskier and subject to the whims of the state utility (CFE) and regulators. Mexico's front-of-the-meter BESS market is practically nonexistent. BESS is not defined by law but rather by the market.

Take the recent 42-ton 5MWh cabinet shipment from Shanghai to Australia - the \$28,000 fee broke down to \$15,400 for ocean freight, \$6,500 for hazardous materials compliance, and \$4,100 for ...

The Latin America Energy Storage Market Report aids in assessing & mitigating risks associated with entering or operating in the market. By understanding market dynamics, regulatory frameworks, and ...

National renewable energy targets and rising curtailment levels are pushing governments to integrate storage into their energy planning. Regional tenders ...

National renewable energy targets and rising curtailment levels are pushing governments to integrate storage into their energy planning. Regional tenders have proven effective in driving projects, notably ...

Latin America Energy Storage Outlook 2025 - The "Latin America Energy Storage Outlook 2025" explores the Latin American energy storage market across the utility-scale, C&I, and ...
